Professional Summary

Cyber Security graduate with **First-Class Honours** from **De Montfort University Dubai** and international research experience at **FH Hagenberg (Austria)** and **PwC Austria**. Experienced in **malware analysis**, **penetration testing**, **digital forensics research**, and **AI-driven cybersecurity solutions**. Passionate about applying technical and analytical skills to strengthen organizational security through **threat detection**, **vulnerability assessment**, and **compliance**.

Work Experience

AGILE MANAGEX TECHNOLOGIES, DUBAI SILICON OASIS, DUBAI, U.A.E.

Cyber Security Lead Generation Trainee

April 2026 – Present

- Identified and engaged potential clients for cybersecurity solutions and services.
- Generated and qualified leads through email outreach, LinkedIn networking, and cold calling.
- Assisted the sales team in promoting cybersecurity products, risk management solutions, and compliance services.
- Scheduled meetings and product demonstrations between prospects and cybersecurity consultants.

UNIVERSITY OF APPLIED SCIENCES IN UPPER AUSTRIA, FH HAGENBERG, AUSTRIA

Bachelor's Research & Development Intern

June 2025 - July 2025

- Researched de-nesting techniques and digital forensic workflows.
- Evaluated forensic imaging, hashing, and NSRL hashset tools.
- Investigated parallel hashing strategies for large-scale forensic analysis.

PWC, LINZ, UPPER AUSTRIA

Bachelor Intern (In collaboration with FH OÖ Hagenberg, University of Applied Sciences in Upper Austria)

July 2025 – July 2025

- Contributed to the design of an AI-based regulatory compliance reporting platform.
- Assisted with compliance report structure, system design, and application layout using EU legal resources.

Education

DE MONTFORT UNIVERSITY, DUBAI

Dubai Internet City, Dubai

- Course: BSc. (Hons) Cyber Security
- Graduated with a First-class Degree with Honours.
- Relevant Coursework:
 - Computer Networks, Web Application development, Database design and Implementation, Incident/ Threat recognition and response, Cryptography, Penetration testing

Projects

DE MONTFORT UNIVERSITY, DUBAI

Host-Based Penetration Testing

- Conducted a black-box penetration test on a university VM following the NIST 800-115 methodology.
- Performed reconnaissance and vulnerability assessment using Nmap, Nessus, and Metasploit.
- Identified vulnerabilities including SSH, SMB, FTP, NFS, and weak authentication mechanisms.
- Produced a technical report with risk assessments and remediation recommendations.

Malware Detection Using Explainable AI (XAI) (Final year research Project)

- Developed a malware detection framework using machine learning with Explainable AI (SHAP/LIME).
- Built and evaluated models using Python, Scikit-learn, Pandas, and NumPy on real-world malware datasets.
- Improved transparency of model predictions through explainability techniques.
- Produced a research report highlighting performance, interpretability, and practical cybersecurity applications.

Student Leadership Activities

DE MONTFORT UNIVERSITY, DUBAI

Dubai Internet City, Dubai

Student Vice President of Education

2024 – 2025

- Led a team of class representatives across multiple academic levels.
- Represented students in monthly meetings with university leadership.
- Advocated for student concerns and coordinated communication between students and faculty.

Student Representative (Cyber Security)

2022 – 2024

- Served as liaison between students and faculty, supporting academic and administrative concerns.
